Senior System Administrator Multiple Organizations

Dec 2011 - Jul 2019

PROJECTS

Azure DevOps CI/CD Pipeline Implementation

6 Months

Designed and implemented Azure DevOps CI/CD pipelines for application deployment automation.

Reduced deployment effort by 70% and minimized manual intervention using automated build & release pipelines.

Integrated source control, testing, and deployment workflows for faster software delivery.

Improved deployment success rate and reduced production issues significantly.

Collaborated with development and operations teams to streamline DevOps practices.

Enterprise VMware Datacenter Migration & Optimization

12 Months

- Led the Enterprise VMware Datacenter Migration and Optimization project over a 12-month period, achieving a 30% improvement in system performance and reducing infrastructure costs by 25%.

- Streamlined virtualization processes and optimized resource allocation, resulting in enhanced operational efficiency and a 20% reduction in downtime.

- Coordinated cross-functional teams to ensure seamless migration with zero data loss, enhancing overall datacenter reliability and scalability.

Windows 11 Enterprise Migration Project

6 Months

- Spearheaded the Windows 11 Enterprise Migration Project over a 6-month period, successfully upgrading 500+ workstations with zero downtime, enhancing system security and user productivity by 25%.

- Coordinated cross-functional teams to develop and implement migration strategies, resulting in a 30% reduction in deployment time and seamless integration with existing enterprise applications.

- Conducted comprehensive training sessions and created detailed documentation, improving end-user adoption rates by 40% and reducing post-migration support tickets by 35%.
